

Tax Calculator Website

Welcome to the Tax Calculator website. This web application allows users to calculate their income tax based on their age, gross annual income, and deductions. Here's how to operate the website:

Getting Started

To use the Tax Calculator website, follow these steps:

1. **Access the Website:** Open your web browser and navigate to the URL where the Tax Calculator website is hosted.
2. **Input Age:** Select your age range from the dropdown menu provided. The age ranges are:
 - **<40:** Less than 40 years old.
 - **≥40 & <60:** Between 40 and 59 years old (inclusive).
 - **≥60:** 60 years old or older.
3. **Input Income:** Enter your gross annual income in Lakhs in the "Income" field. For example, if your gross annual income is 40 Lakhs, enter "40" in the input field.
4. **Input Extra Income:** If applicable, enter any extra income in Lakhs in the "Extra Income" field.
5. **Input Deductions:** If applicable, enter any deductions in Lakhs in the "Deductions" field.
6. **Submit Calculation:** Click on the "Calculate Tax" button to perform the tax calculation based on the provided inputs.
7. **View Result:** After clicking the "Calculate Tax" button, a modal will appear displaying the calculated tax amount.

The screenshot shows a web form titled "Tax Calculator" on a light orange background. The form contains four input fields, each with a label and a help icon (a question mark in a circle):

- Enter Age**: A dropdown menu with the text "Select age" inside.
- Enter Gross Annual Income**: A text input field.
- Enter Extra Income**: A text input field.
- Enter Deductions**: A text input field.

Below the input fields is a blue button with the text "Calculate Tax".
